

The background of the cover is a photograph of a snow-capped mountain peak, likely Mount Everest, under a clear sky. The mountain's upper reaches are bathed in a warm, golden-orange light, while the lower slopes and surrounding areas are in deep shadow, appearing in shades of blue and black. In the top right corner, there are white, concentric, wavy lines that resemble topographic map contour lines. In the bottom left corner, there are similar white, concentric, wavy lines.

MISSION STATEMENT

We believe in quality sleds that will last for seasons to come. We, like you, cherish the memories shared between family and friends while racing down snow covered hills.

Avalanche Brands was founded off the core value of using quality materials to create safety and fun for the whole family. We are determined to provide you with the best experience and products that we possibly can.

SAFE,

SPEEDY,

And

STRONG

TRUST US,

we *wish* our competitors cared as much about their quality of material as we do. Our sleds are made with a thicker plastic than our competition. Avalanche Brands sleds are built for durability to ensure you are having fun for seasons to come. Our sleds are all 1/8th inch thick while other brands are just *half* that size.

AVALANCHE BRANDS
Stays strong under stress

CHECK OUT THESE REVIEWS

"It goes super fast, and even though it may seem small it fits my wife and 3 year old in her lap. It's very lightweight and glides like butter, so it's not a pain to carry up the hills! My 3 year old can pull it around with no complaints or issues."

-Edward

"My husband and I took turns (we are under 150 lbs) on this in White Sands National park on the sand dunes. It was an amazing time. So worth the price to have this."

-Alise

"Got this for my grandson and his Dad to go sledding together. It's huge, just perfect for them to go down' hills two on a sled. His Dad is 6'3" and he can sit on this with my grandson sheltered against him, and he has plenty of leg room. This sled screams in the snow he says! And a bonus, it's very lightweight to pull around. So, would recommend this highly."

-J.W.
